

FMD and CSF Coordination Action

Second International Disease Control Workshop
Stakeholders' Interests in the use of Science/Technology
and Decision Making

The future of science-based prevention and control
of transboundary animal diseases

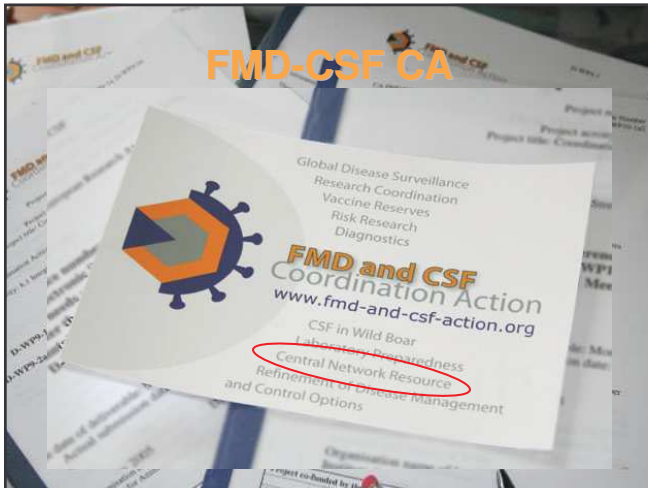

First Euroflat Hotel, Brussels, 18 October 2007

FMD and CSF Coordination Action

Introduction

Dr. John Bashiruddin
Vesicular Diseases Control
Institute for Animal Health, Pirbright, UK

WP9 Objectives

- Information exchange between project partners
- Imparted information related to the CA to the wider scientific community and to other stakeholders interested in FMD and CSF (open-access website www.fmd-and-csf-action.org)
- Feedback to be imparted from the wider stakeholder community, so that concerns and issues can be identified and then considered by the CA network
- Establishment of permanent platform for dissemination of information
